

5' x 7' COUNTER EXAMPLE
90 Degree Layout

Installing Over Cabinets

Benissimo *Granite Solutions* is designed to fit most standard counter tops with little to no cutting. Please note on the Bullnose Profile below that the underside measurement will be 12.5". The extra half inch allows for easier fitting on out-of-square corners. Do not install flush to cabinet face as wood still expands and contracts.

BULLNOSE PROFILE

Measuring & Calculating Components Needed

For your counter project, simply measure the walls and make your drawing as shown above with the 90-degree layout. To accommodate stoves and sinks, make cuts to the center portion of the tiles.

and add approximately 5% more for mis-cuts and extra. As all pieces are shade-matched at our warehouse before shipping, it is important that enough is ordered the first time.

Add up the pieces necessary to complete your project
