**METAL  
PROFILES**

**BEAUTIFUL TRANSITIONS**

surface art inc

Many times, projects require profiles to finish off a particular edge or transition from one material to another. Surface Art carries the most popular profile edges in multiple finishes so you can complete these projects with ease. We also carry a patented stair edging so you can install any tile on your stairs without worrying about slipping.

# TRADITIONAL METAL PROFILES

## DUROSOL

### BENEFITS

DUROSOL profiles are L shaped edging profiles which have been designed for use in many different areas and applications and are available in heights ranging from 1/4" to 1/2" with a narrow visible edge. They are ideal for protection of a secure edge trim and for the clean separation of different surfaces.

### SPECIFICATIONS

98.5" in length

Anodized aluminum, professional grade

Heights available: 0.25", 1/4", 6mm  
0.3125", 5/16", 8mm  
0.375", 3/8", 10mm  
0.5", 1/2", 12mm

Compliant with all TCNA & ANSI recommendations & requirements  
Made in Germany

## DURONDELL

### BENEFITS

DURONDELL profiles are ideal for the simple and accurate creation of round edges, but are also suitable for use as a decorative skirting finish. These are available in a wide range of colors and finished in 3/8" (10 mm) height. Matching internal and external corners complete the range.

### SPECIFICATIONS

98.5" in length

Anodized aluminum, professional grade

Heights available: .375", 3/8", 10mm

Compliant with all TCNA & ANSI recommendations & requirements  
Made in Germany

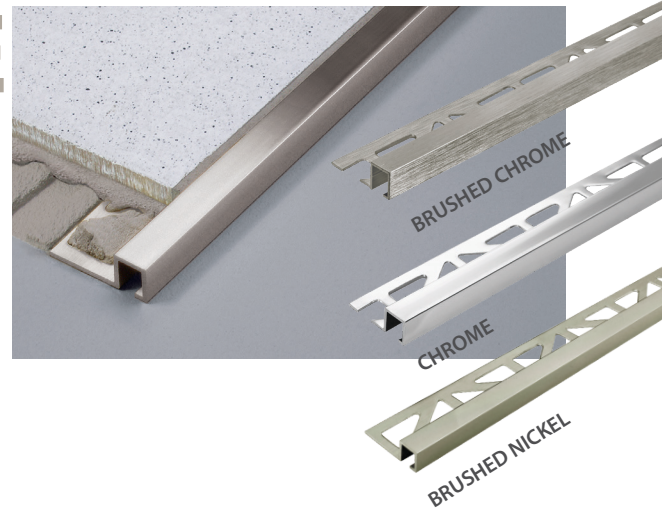

# SQUARELINE

## BENEFITS

SQUARELINE box section trims, combine modern and timeless design with secure edge protection. Available in 11/32" (9 mm) height. DURAPLUS profiles and corners are ideal for high quality edge protection and for the clean separation of different flooring finishes with an extra-wide 8 mm surface. Available in 7/16" (11 mm) height. \*

## SPECIFICATIONS

Anodized aluminum, professional grade  
Heights available: 0.4375", 7/16", 11mm  
Compliant with all TCNA & ANSI recommendations & requirements  
Made in Germany

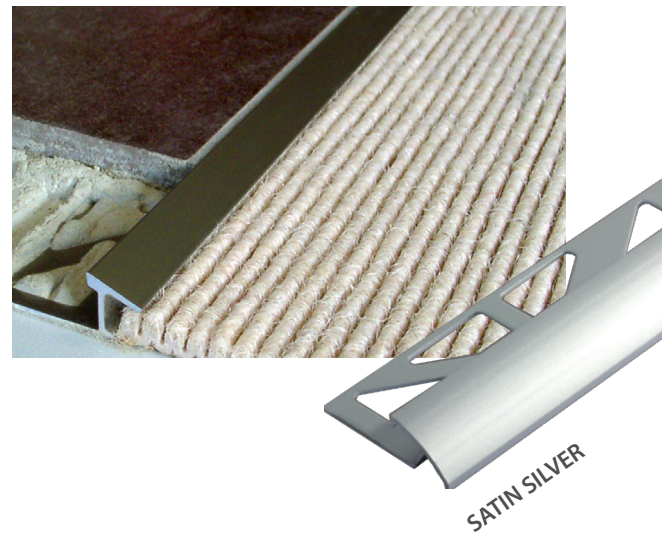

# DURATRANS TC

## BENEFITS

DURATRANS profiles in aluminium or brass are used for height differences of up to 20mm in the transitional areas of ceramic flooring including adhesive. The design and material have been selected to ensure that the profiles are able to resist large loads, point loads are evenly distributed in the flooring surface and the adhesive.

Anodized aluminum, professional grade  
Heights available: 0.3125", 5/16", 8mm  
0.4375", 7/16", 11mm  
Compliant with all TCNA & ANSI recommendations & requirements  
Made in Germany

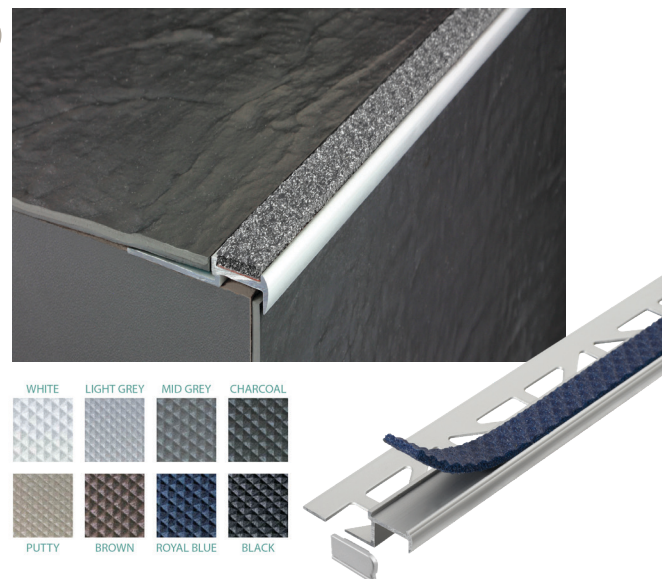

# DIAMOND STEP

## BENEFITS

Diamondstep is an extremely slip-resistant stainless-steel stair nosing profile for installation on tile and natural stone steps. The Tredsafe Diamondstep stair edging is the only stair edge that allows you to select the color of the tread material. The Tredsafe insert makes any porcelain tile comply with all ADA requirements.

## SPECIFICATIONS
